clerk@tangmere-pc.gov.uk

MEMBERS OF TANGMERE PARISH COUNCIL ARE HEREBY SUMMONED:-

TO AN EXTRAORDINARY MEETING OF THE COUNCILTO BE HELD AT
7.00PM ON TUESDAY 16 AUGUST 2022
AT THE VILLAGE CENTRE, MALCOLM ROAD, TANGMERE PO20 2HS
.

ALL MEMBERS OF THE PUBLIC HAVE A RIGHT, AND ARE WELCOME TO ATTEND, BUT MAY ONLY SPEAK AT THE INVITATION OF THE CHAIRMAN.

11 August 2022

Louise Steele - Parish Clerk

AGENDA

1. Apologies
To receive apologies for absence and approve reasons for absence.

2. Declarations of Interest
To receive from Members any declarations of disclosable pecuniary and non-pecuniary interests in relation to any items included on the Agenda for this meeting required to be disclosed by the Localism Act 2011 and the Tangmere Members' Code of Conduct.

3. Community Warden Review
To consider the parish council's response to the Chichester District Council Community Warden review – supporting papers circulated with this agenda.

4. Recruitment of a Parish Clerk
To note the recent resignation (effective 30 September) of the Parish Clerk and to consider a proposal from LGRC Associates Ltd for support with the recruitment of a new Clerk (proposal circulated as a confidential supporting paper).

5. NHB 2019 Drainage link South/South West edge of Recreation Field.
To receive an oral report from the clerk about the progress and funding of the above project and to consider the allocation of £1,545 from Community Infrastructure Levy.

6. Date of next meeting
The next ordinary meeting of Council is scheduled to be held on Thursday 15 September 2022

Subject: Community warden review

Hi all,

Please forgive the email to everyone but for transparency I wanted to ensure you all had sight of the Community warden data review, the paper which went to informal Cabinet and was agreed which will inform my paper to official Cabinet in September and the proposed funding contributions for 2023/24.

Please read the attached papers carefully to see the rationale behind the changes as the new funding model is based on numbers of wardens as a whole, how many per area and how many households are in social housing. I have no idea how the original funding was worked out but this seems a much fairer way of dividing it up. All areas will be expected to cover 50% of their community wardens and a proportion of the floating role and a small proportion of the senior role except for the City Council who have most of his time. You are all aware I had been tasked to achieve 50% funding of the whole service for some time now and the figures in the new table are less in most cases than those originally mooted in 2020. In fact CDC have continued to fund as per the original arrangement for an additional year. It should be noted you have all enjoyed a first class service for over 16 years now and little has changed in the way of funding.

I accept for the majority of you there is an increase in contribution and I am sending this now in recognition of the time you will need to make the necessary financial arrangements. If we do not manage to achieve the full 50% funding then we may have to consider reducing the service. I acknowledge the removal of a warden form Tangmere and Oving will be a shock but there is no evidential base for having two and the existing funding only just covered over 50% of one warden.

The review was always going to result in changes and I have done my best to keep the impact to a minimum. I will also be investigating additional funding from social landlords not already contributing particularly in the City wards, Bracklesham and Tangmere and this may result in a reduction in contributions for those areas.

Kerry and Duncan I appreciate you do not currently fund but if you could go back to your prospective organisations to gauge support that would be very much appreciated.

I will be setting up a steering group meeting soon after the Cabinet on 6 September to discuss.

Please feel free to contact me in the meantime.

SLT Chichester Community Warden Service Funding

Recommendation

SLT to note the data review of the Community Wardens (appendix) and suggestion around redeployment of 1 community warden from Tangmere and Oving.

SLT to recommend options 3 and 5 to informal Cabinet on the 13 July 2022.

Summary:

As part of the Policy review work it was suggested that we explore the option of increasing partner contributions to the Community Warden Service to reflect 50% of the whole service. Partners currently contribute 50% excluding the Senior Community Warden post which was estimated at £48,000 therefore we are seeking an additional £24,000 from partners. In November 2021 Cabinet resolved to continue current levels of funding until 31st March 2023 and that a fundamental review is undertaken in 2022 to ensure the Community Warden Service is delivered in the areas most in need, the service is still fit for purpose and a transparent and equitable funding model is developed that meets 50% of service costs.

A review of data for each of the areas covered by the Wardens is attached as evidence to inform the continued provision of the service in each area and the future funding model.

Background:

The Community Warden Service has been in operation since 2005 and currently consists of 7 Community Wardens and 1 Senior Community Warden. They are based and operate in the wards of Chichester East, West, South, Selsey North and South, Tangmere and Oving; plus Bracklesham and East and West Witterings. For The last 4 years the Senior Community Warden has been working in the City centre providing a much-needed presence and support to the retailers, homeless services and visitors to the City centre. The wardens support their communities dealing with low level anti-social behaviour and helping voluntary groups run community watch schemes and support projects that involve some of the most vulnerable in their communities. The service operates on a partnership basis funded by various local partners. CDC hosts the service and contributes 50 % of the service costs plus 100% of the Senior Warden costs. At Cabinet in November 2021 it was agreed to continue funding as is until March 2023 whilst future funding options could be explored. The exact funding formula, by which the original levels of funding were agreed, is unclear, however, it may have been based on the number of community wardens, population levels and numbers of social housing tenants in a given area, it is also likely to have been set at whatever partners were prepared to pay at the time. The service has been subject to a number of reviews over the last 15 years the last one was in 2013 and partners have been consistent in their support, however it was felt another review was necessary to look at how the service is funded and to shape the future of the Community Warden Service.

Review

In scope

After discussion with SLT in 2021 the following were included in the review:

- Areas in which they currently work
- Funding model
- Accreditation- currently the Community wardens have no powers.

Out of scope

Extending to other areas of the district.

Summary of findings

The review which has been undertaken has looked at various data sets and shows the areas in which community wardens currently work are still generally the most deprived in the district with most having over 50% of households with at least one dimension of deprivation and in Selsey is highest at over 64% and Tangmere and Oving is lowest at 48%. Within the community warden areas there are 3537 households in receipt of Council Tax Reduction an indicator of low income, with the most in the city wards and Selsey, Tangmere and Oving have the least but with 232 out of 1,106 households they had a high proportion at 21%.

These areas have a significant number of vulnerable residents within them with all wardens except those covering Chichester East and Whyke spending over 13% of their time on welfare for residents. There are also relatively high levels of crime compared toother areas of the district. Chichester East and Whyke has the highest monthly average of crimes at 114 and Chichester West and Tangmere and Oving have the least at 35.

The only area with two community wardens currently is Tangmere and Oving, looking at the data and the current contribution from both parishes this falls well short of what would be considered necessary for two community wardens. It is proposed that one of the community wardens from this area is redeployed to provide support to other warden areas especially Selsey and Bracklesham and Witterings as they have the highest populations at 10,737 and 5117 respectively, this cover would especially be needed in the summer season and over national holiday periods. They would also provide weekend cover where necessary and cover for leave in all areas. This cover used to some extent be delivered by the Senior Community Warden but now they provide valuable support in the City centre their ability to cover is limited.

The table below summarises some of the key household data around deprivation and those in social housing.

Table 1 **Key household data around deprivation**.

Area	Number of Households	Households with at least one dimension of Deprivation	Households in social housing	Households in receipt of CTR
Chichester East and Whyke	3939	56.06 %	2882	2210 or 35.5%
Chichester West	2276	56.9%	Combined as above	Combined as above
Selsey	4863	64.9%	413	753 or 15.4%
Bracklesham and Witterings	2255	59.16%	234	342 or 15.2%
Tangmere and Oving	1106	48.8%	314	232 or 21%

Financial Implications

Last financial year the total community warden budget was £298k which minus partner contributions left a CDC contribution of £175k which includes £48k for the Senior Community Warden role. In 2018 the MOU with partners was updated and reflected a 2% inflationary increase in partner contributions which all have agreed to continue until end of March 2023. We are seeking to rebalance the contributions to the service across all partners and identify funding from any newly identified funding streams with a target of 50/50 funding between partners and CDC. Based on partner funding of £152k now being sought across all 8 posts including the Senior Community Warden we need to achieve £19k per post . This provides a good baseline for working out what each areas costs would be and then working out what registered providers should be contributing based on the housing numbers per provider in each area with each household equating to around £10.

The table below shows the funding needed to be achieved across all areas if we take one community warden from Tangmere and Oving and redeploy as a floating warden across all areas for cover and support. It also shows the proportion of funding required from registered providers based on the number of houses they have in each area. The current costs per each Parish council is highlighted in the table for comparison and for most there is little change but the load is spread more evenly. The areas with the most change are Bracklesham and Witterings and Chichester City, some of this could be mitigated with the £6400 contribution from the Community Safety Partnership (not included in the calculations as not formally agreed as yet).

Table 2. **Proposed funding model**

Area	Contribution needed for proposed provision	Registered Provider contribution based on £10/unit	Cost to Parish Council	Proposed future provision
Chichester City	£86,856	£28,820	£58,036 £43,296	4x wardens
Selsey	£21,714	£4,130	£17,584 £19,118	1 x warden
Bracklesham and Witterings	£21,714	£2,340	£19,374 £13,582	1x warden
Tangmere and Oving	£21,714	£3,140	£18,574 £19,277	1 x wardens
Total	£151,998	£38,430	£113,568	1 x floating warden role (included in total)

Highlighted figure is current Parish contribution per area.

Options including risks

1. **Stay as is – partners pay 50% of the community wardens and CDC pay 50% for the community wardens and 100% Senior Community warden for the next financial year.**
   This would hopefully give the cost-of-living crisis time to settle and partners more time to arrange additional funds, however, this goes against the Cabinet resolution made in November 2021 which said a new funding model would be brought forward.

2. **Passport 40 % of senior Community warden costs to Chichester City Council as 80% of their time is spent working in the City. All other funding partners pay remaining 10% between them for supervision.**
   Chichester City Council would bear the brunt of the funding increase as they have the benefit of the senior Community Wardens time but may struggle to find the additional funds and in previous conversations have been reluctant to raise their precept.

3. **Invite new contributions from Abri, Linden Homes and Vivid Housing in light of all the new developments in Chichester, Tangmere and Witterings, and divide remaining shortfall between the City and Parish Councils for those areas.**
   Abri have intimated in previous conversations they may contribute but not to what level and the conversations are yet to be had with Linden homes and Vivid. It would mean smaller potentially more manageable additional contributions from the other partners. This option also does not reflect the Cabinet resolution that a fair funding model is put in place based on the data, however, it does reflect increased population due to development.

4. **Revisit the option previously shared with partners to divide the full amount necessary for 50% of the whole service between all partners by % they already contribute to the service.**
   This was shared with partners in 2021 and all were very reluctant to pay the additional funds and where PC funding they were not happy to look at precept rises and they may be even less willing to look at this due to the national financial crisis. This option also does not reflect the Cabinet resolution that a fair funding model is put in place based on the data and merely inflates the previous agreed figures.

5. **Apply a new funding model that is based on number of community wardens needed for each area plus a floating role to provide support and cover, the number of households and how many are in social housing for each area as in table 2 above.**
   This would ensure areas like Selsey are supported during busy times without the need for an additional full time warden and all areas get better cover for leave and the costs of the service are more evenly distributed to reflect need.

Outcomes

50% funding of the service as a whole.

Saving to CDC of £24,000 per annum

A fairer more transparent funding model that all partners sign up to and agree based on service received.

A community warden service fit for purpose, delivering a responsive, effective and supportive service in the areas identified as in need.

Timetable

- Review Completed May 2022
- SLT paper July 2022
- Cabinet September 2022

Conclusion

The Community Warden service has been delivered and funded in the same way and in the same areas for over 16 years. In previous consultations any suggestion that the community wardens have enforcement powers have been dismissed due to fears they will be perceived differently by residents and the trust in the service built up over the years could be affected. Any changes to the service and the funding model need to be handled carefully in order to preserve the good partnership relationships that currently exist and to avoid any partners withdrawing their funding altogether.

Table showing proposed funding contributions based on the new funding model.

Funding Partner	Total contribution for 2022/23 including 2% uplift £	Proposed funding contribution £ 2023/24	Difference £
West Wittering PC	3,463	4,874	+ 1411
Tangmere PC	13,162	11,000	- 2,162
Selsey Town Council	19,118	17,584	-1,534
Oving PC	6,115	7,287	+1,172
Hyde	22,730	23,880	+1,150
Clarion	2,976	6,240	+3,264
Home group	648	1,070	+422
Earnley PC	378	500	+122
City Council	43,296	55,836	+12,540
Bracklesham and E Wittering	9,741	10,000	+259
Community Safety Partnership	6,400		Shared between west Wittering (£4000 and Chichester City Council £2200)
£	128,027	£144,671	

Additional funding is being sought from Abri Housing £930 and £4040 from A2 Dominion as well as Vivid Housing and Linden Homes so the totals may change slightly but the table shows the most you would be paying per year.
